The emissions context

Domestic total
1826 ktCO₂

Commercial and industrial total
2237 ktCO₂

Transport total
1898 ktCO₂

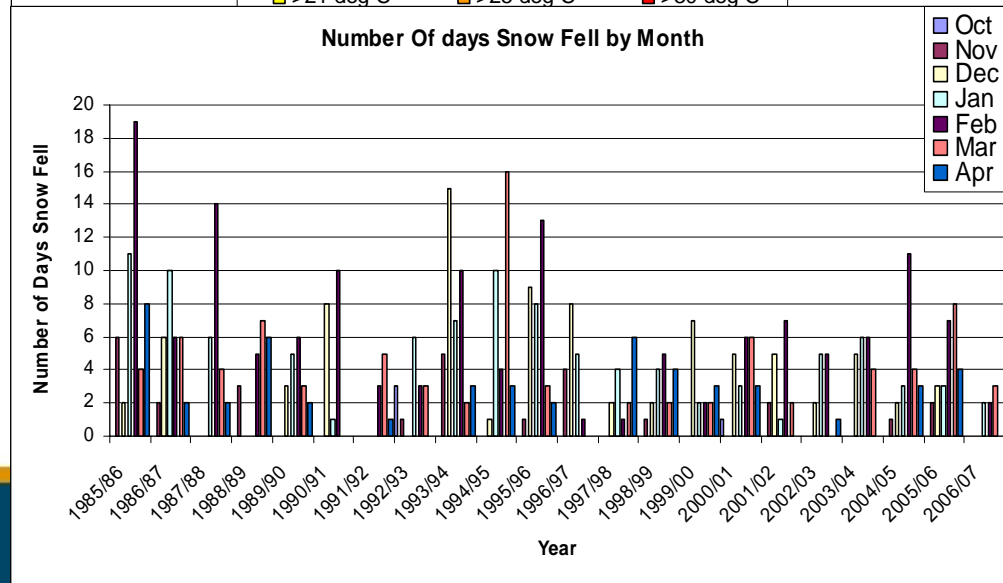

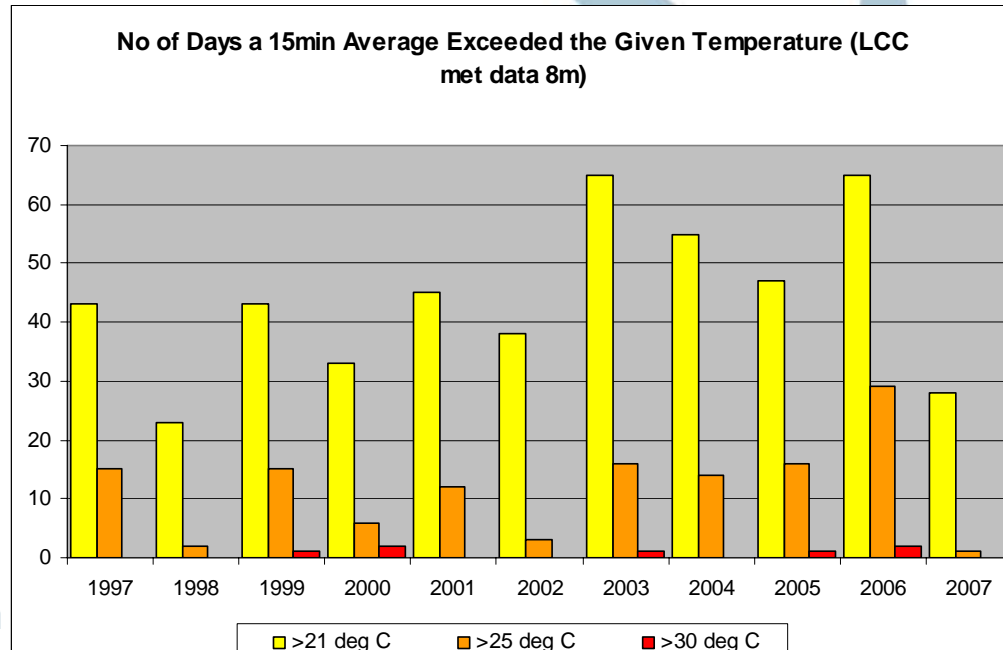

Future climate in Leeds?

□ Long term/seasonal averages

- Warmer drier summers
- Milder wetter winters
- Rising sea levels

□ Extremes

- More very hot days
- More intense downpours of rain
- Shorter return periods for high water levels at coast
- Uncertain changes in storms, possible increase in winter

Climate Change - Let's make the switch

The Leeds Climate Change Strategy - Consultation Announcement

How will climate change affect Leeds?

How should we deal with it?

What part can you play?

Please help to shape our climate change action by getting a consultation document from the Leeds Initiative and giving us your views.

The consultation is open from 4th February to 17th March

Together we can

the Leeds Initiative

Priorities

□ Key Emissions Reduction Activities

- Home Energy Efficiency
- Transport Infrastructure & Demand Management
- Partnership Emission Reduction
- Waste & Resource Efficiency
- Business Emission Reduction
- Low Carbon Energy Infrastructure
- Low Carbon New Developments

Priorities (cont)...

□ Key Adaptation Activities

- Risk Assessment & Priority Interventions

□ Key Cross-Cutting Activities

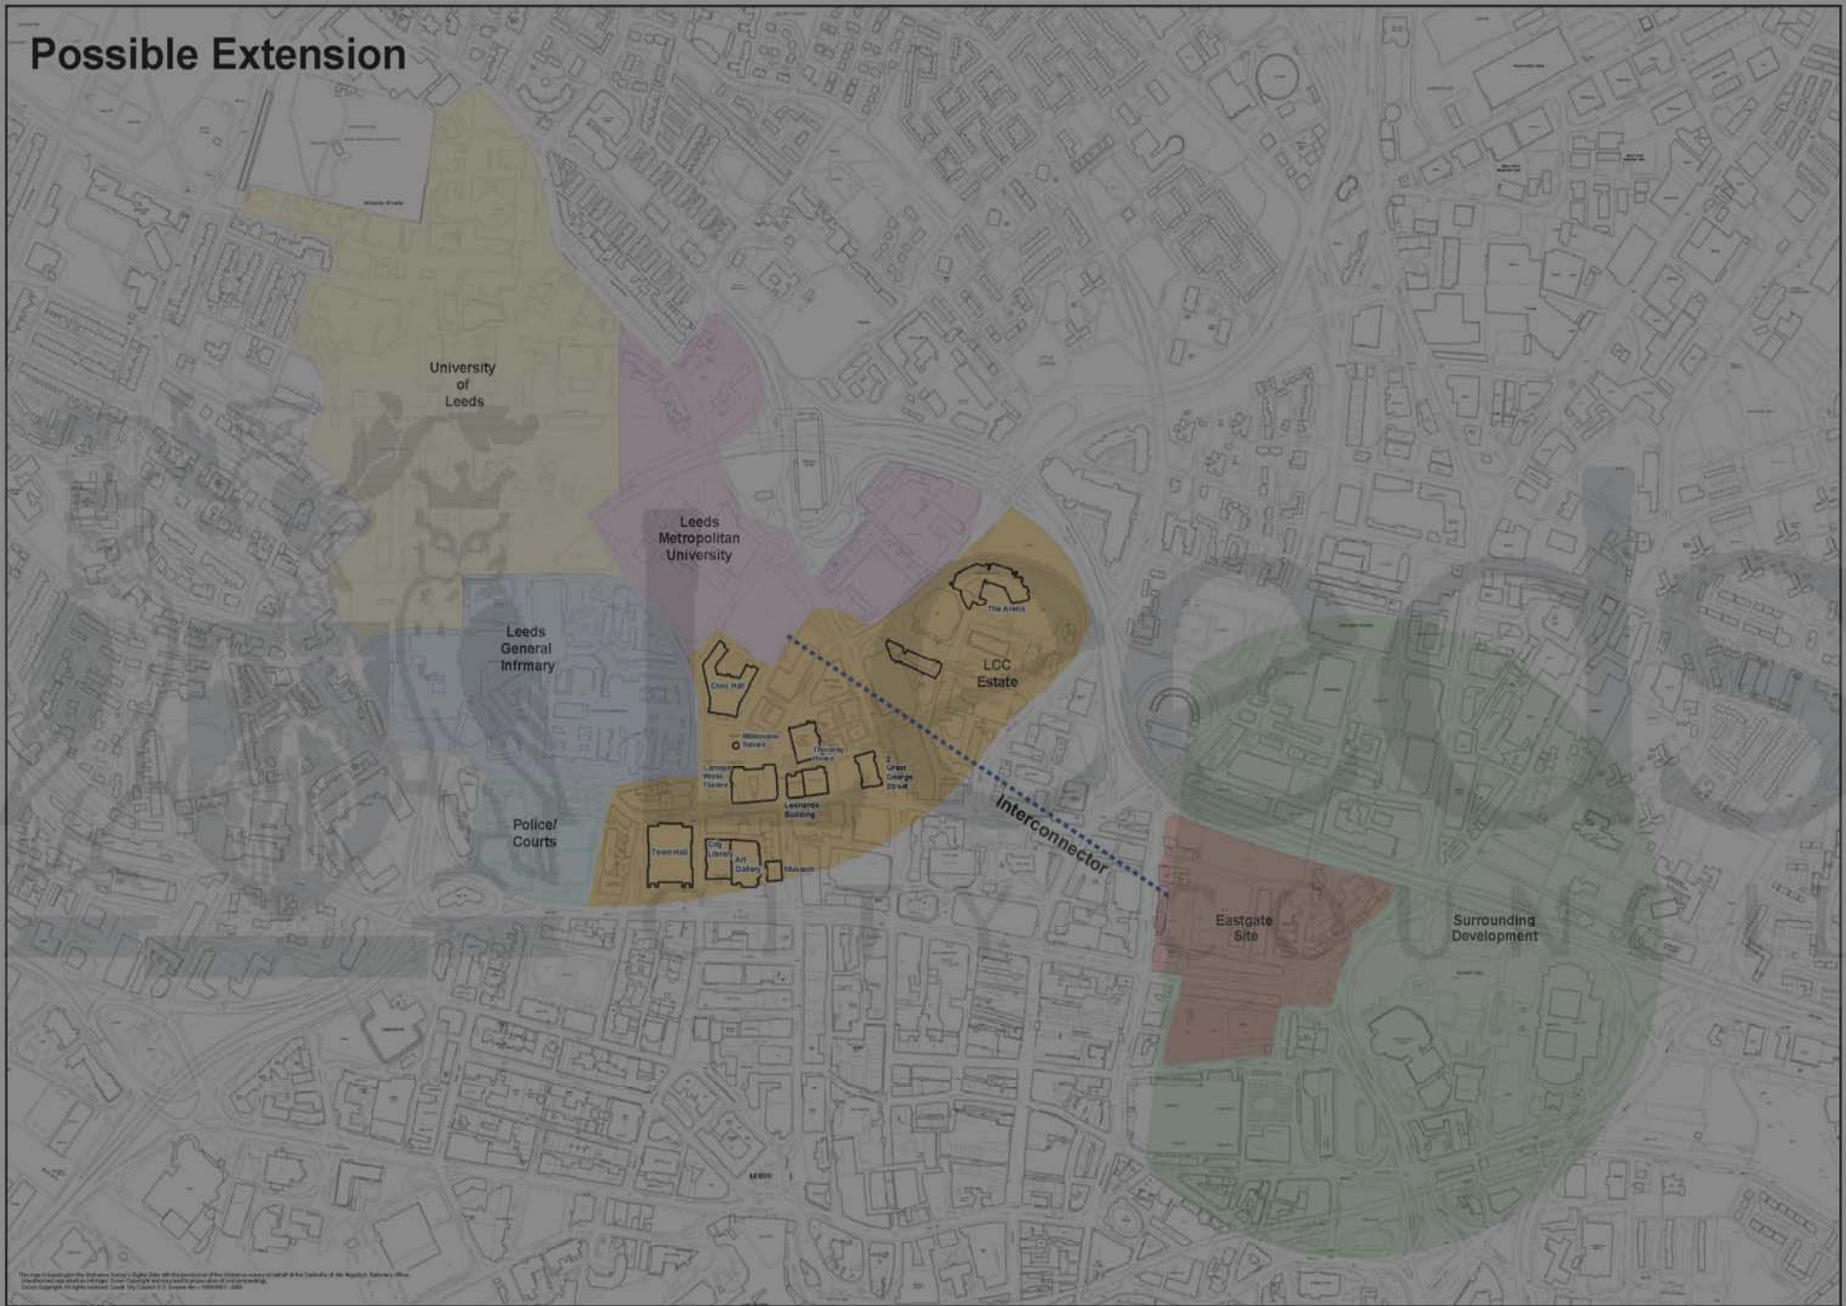

- Information Collation, Coordination & Inspiration
- Moving to a Low Carbon Economy

SHARED ENERGY

THE WISDOM OF CROWDS

**“I care about
climate change...**

**...so I pledge to join the thousands
of other people in Leeds who are part
of the solution by taking action to
reduce my personal greenhouse
gas emissions.”**

**To do this I will...
Travel light and leave the car
at home.**

Leeds Climate Charter

whizzgo.co.uk

Commits to take on the climate change challenge by:

- Understanding our climate change impacts
- Measuring our CO₂ emissions and establishing an action plan
- Understanding the risks to our business and employees
- Celebrating our successes
- Sharing the burden with others
