E.ON is one of the largest EV operators across Europe

Over 99.8% uptime of the network across Europe

Full consultancy and support to ensure the right network is installed and future proofed

All energy costs recovered from drivers

Full maintained and serviced

24/7 customer support for drivers

The complete hassle free EV solution managed by E.ON & GES

Consultancy

Our in house EV experts will understand your requirements, business and EV strategy and recommend the right solution and options for you.

Installation

Once agreed a dedicated project manager will be assigned and will liaise and manage this through to full installation.

Full electrical and power source connection.

We can also include signage and bay marking.

Hardware

We are hardware agnostic therefore can recommend the right type of chargers required.

Our chargers include 7kW home chargers to 150kW Ultra-fast chargers

Support & systems

Live monitoring of all chargers including remote repair.

Full maintenance & servicing.

Full reporting & fleet management service.

Different payment options.

Flexible platform to create

Energy pricing

We can provide guidance on setting the right charging tariff and securing the best power source to help drive high levels of utilisation of the network.

Supported by a dedicated account team

We are fully OLEV accredited and can support with accessing any available grants

Simple and intuitive user experience and access

We have 3 simple payment options available:

E.ON Drive app
Register and access
using the app

One off PAYG
No need to register

RFID key fob
Register and access
using a key fob

**Our app will allow easy and simple
access to our EV chargers**
